

ABOUT US

We specialize in creating sustainable change for individuals and organizations in the areas of career development and transition, executive coaching and onboarding, relationship building and networking, online reputation repair and business start-up services.

Corporate Transition Program

Our Corporate Transition Program enables a sponsoring organization to outsource the management of impacted employees. Through the use of creative tools, we create custom programs to fit within your budget without minimizing the effectiveness of the program, which is similar in structure to the Individual Partnership Quest program.

When you partner with us, you get personalized attention and support from highly qualified professionals. Our team is made up of executive career coaches, transition specialists, branding and marketing experts, resume writers, and social media gurus. Not only are we experts in our field, but many of us also have a background in healthcare. Because of this, we are exceptionally well-connected with healthcare recruiters -- many of whom consistently look to us for a steady stream of qualified candidates.

We make it easy to do business with us by creating viable outplacement solutions that align with your organizational structure and its existing policies.

BENEFITS TO YOUR ORGANIZATION

- You hire a team of professionals, not just an individual, giving you and your impacted employees access to a comprehensive toolkit and personalized attention.
- Programs are designed to meet any budget with services to help employees at any stage in their career -- from the young careerist to the C-Suite.
- Our programs reduce the length of time that terminated employees receive unemployment benefits by helping them find their next position.
- Avoid costly legal disputes by obtaining a general release from employees as a condition of providing our program.
- We maintain communication with you by providing monthly progress updates of those enrolled, making it easy on you to track and report placement success.

Note: Concierge programs available upon request. These are geared for your high-level executive that needs additional coaching.

IMPACT ON YOUR EMPLOYEES

We provide the affected employees with "career insurance," giving them the confidence to pursue new career opportunities without suffering financial, professional, or emotional harm.

This includes helping to:

- Restore self-esteem and morale more quickly during a vulnerable time.
- Better understand their current situation and why they were impacted.
- Assess career direction and receive the support for a successful transition.

WHAT MAKES US DIFFERENT

In addition to providing completely **customized programs** to meet any budget, we also offer **spousal/partner support** that engages the family of the impacted employee. With nearly 30 years in the business of healthcare transition and outplacement, we have strong relationships with not only healthcare recruiters, but **a vast network** of professionals that serve as a vault of connections for your impacted employee.
